

CHANGING LIVES SAVING LIVES MAKING A DIFFERENCE

The top priority of the Kidney Foundation of Central Pennsylvania (KFCP) is ensuring the best possible experience for all those impacted by chronic kidney disease by providing the support and resources they need to experience an exceptional outcome in all the areas we serve.

OUR NUMBERS - SHOWN BELOW - REVEAL THE IMPACT WE ARE MAKING!

What is behind the significance of these numbers? Every number has a name, every name has a story, and every story matters to KFCP. Each week, we are privileged to hear stories from colleagues, patients, families and caregivers; and, we listen carefully.

On behalf of the Board of Directors, staff and volunteers, I would like to Thank You for being "you!" - for bringing hope to those dealing with kidney disease and for helping to add happy chapters to these stories - one life at a time.

5,000 individuals received, free, KFCP's kidney health literature on "Are You at Risk?"

Served **28** counties, **64** dialysis centers and **3** transplant programs.

50 kids attended Camp Kydnie where they experienced outdoor fun, engaged in team building activities, expressed their creativity, developed independence and grew in confidence.

500 children received KFCP's new "Be Kind to Your Kidneys" book from which they learned how to take care of their kidneys to help prevent kidney disease.

Living Healthy with Kidney Disease - provided a "mix and mingle" for over **275** dialysis patients, their families and friends where they shared experiences and learned from others facing similar health challenges.

Hosted the annual **Update on Chronic Kidney Disease** professional education symposium in Hershey attended by **250** health-care professionals.

Since 2010, the Emergency Assistance Fund has distributed **\$47,625 to 52 dialysis centers** in support of patients experiencing unexpected hardships in managing their health care by enabling them to stay on their scheduled treatment plans.

Through our nationally recognized **Patient & Family Partner Program** we have trained over **100 certified partners** (mentors) who provide support to patients and caregivers.

Since 2011, provided over **100** free or low-cost life-saving medical identification bracelets and necklaces to dialysis patients.

Launching this month, a new website - www.kfcp.org that was made possible by a grant from the First Nonprofit Foundation.

KFCP advocated on behalf of restoring budgetary cuts proposed for the Chronic Renal Disease Program (CRDP) Funding. Instead of the more than 80% reduction, or \$6.6 million, proposed by the Governor, the State Legislature will cut CRDP by only 12%, or \$1 million. CRDP is a vital program that provides patients reimbursement for transportation to dialysis centers and helps with their prescription drug coverage - including post-transplant immunosuppressant drug coverage - and medical coverage as a payer of last resort.

Again, the Foundation **THANKS YOU** and our major partners who have become such valued friends and associates of the **Kidney Foundation** family. Your commitment and belief in our ability to positively impact the lives of individuals and families, in and throughout our community, is extraordinary. We look forward to continuing our future endeavors together.

Have a wonderful Holiday Season and a peaceful, happy, prosperous, healthy New Year.
